

Whether you're planning to take your dog on a holiday, shopping trip or daily excursion, his safety is of the utmost importance every time he gets into the car.

Kurgo one of America's leading pet travel accessory manufacturers, is now selling its product range in Canada. The range includes the Backseat Barrier, which is designed to stop dogs from trying to get to the front of the car and distracting the driver. It's easy to install and remove and fits any car or SUV.

The Wander Hammock can be used as a snooze zone for pets on a long trip and also doubles as a backseat cover. It's made from a waterproof and stain resistant fabric.

The Wander Pack allows your dog to carry his own water and treats and is ideal for day trips. It's designed to fit all breeds between 30 and 85 lbs. The leash attaches to the lower end of the pack, giving owners more leash control.

The Skybox Booster seat enables small dogs to be restrained but still enjoy a window view. It's ideal for all dogs less than 30 lbs. and comes with a built-in tether that attaches to a standard dog harness.

Wander Bowls, collapsible water and food bowls with a draw string to contain the food en-route, are also must-have accessories for pets on the go. These items as well as others in the range are available at PetValu and Mondou stores throughout Canada.
